| 1/27/2015   | SB1500121 | 64 NEW YORK AVE NE       | We will perform a total of three soil borings on the proposed site. The borings will be advanced to a depth of 80 feet below existing site grades, and will be located within the bounds of the private property. The borings will be drilled utilizing 3.25-inch hollow stem, continuous flight augers. The borings will be performed utilizing an ATV-mounted drill rig and will generate an approximate 6-inch annulus. After geotechnical exploration is completed, the borings/auger probes will be backfilled with bentonite slurry, which has a consistency of two pounds bentonite powder to one gallon water. Borehole/auger probe abandonment will be performed by tremie-grouting via a positive-displacement pump from the bottom of the borehole/auger probe. | Building  | Construction | Miscellaneous              | Soil Boring              | Permit Issued | 36.30      | 0669 0854    | 5    | 5C  |        | ECS MID-ATLANTIC, LLC   | BREOF 64 New York Ave REO LLC c/o Adiran Conforti                |       |

| 1/7/2015    | SB1500042   | 1115 PENNSYLVANIA AVE SE         | We will perform a total of 3 borings which will be extended to depths on the order of 60 feet below existing grades. The borings will be drilled utilizing 4.25-inch I.D. hollow stem, continuous flight augers. The borings will be performed utilizing a Truck-mounted drill rig and will generate an approximately 6-inch annulus. Once the confining clay layer is encountered during sampling, 4-inch steel casing will be installed to a depth of at least 2 feet within the clay layer. With the casing installed, the boring will be advanced to the proposed depth with mud-rotary equipment.  | Building  | Construction | Miscellaneous              | Soil Boring | Permit Issued | 36.30      | 0994 0044  | 6    | 6B  |          | JOSE DIAZ ECS MID-ATLANTIC LLC                           | Lionel Lynch CWC Incorp                   |       |

| 1/15/2015   | SB1500103   | 900 11TH ST SE                   | We will perform a total of three borings to a depth of 50 feet below existing grades. We will also be performing one (1) infiltration test utilizing the Johnson Permeameter for a constant head test, as described in Appendix O of the DDOE2013 Stormwater Management Guidebook. The borings will be drilled utilizing 4.25-inch hollow-stem, continuous flight augers. The boring will be performed utilizing a Truck-mounted drill rig and will generate an approximately 6-inch annulus. Once the confining clay layer is encountered during sampling, 4-inch steel casing will be installed to a depth of at least 5 feet within the clay layer. With the casing installed, the boring will be advanced to the proposed depth with mud-rotary equipment. Upon completion of drilling operations and prior to demobilizing from the site, the boreholes will be backfilled with bentonite slurry having a mix design of two pounds bentonite powder to one gallon of water. We will also be performing one test pit with an excavator to measure existing foundation elements. | Building  | Construction | Miscellaneous              | Soil Boring | Permit Issued | 36.30      | 0996 0034  | 6    | 6B  |          | JOSE DIAZ ECS MID-ATLANTIC LLC                           | Omeade Hekmat Auto Club LLC               |       |

| 1/27/2015   | SB1500119  | 2200 RAILROAD AVE SE                       | We will perform a total of three soil borings on the proposed site. The borings will be advanced to a depth of 65 feet below existing site grades, and will be located within the bounds of the private property. The borings will be drilled utilizing 3.25-inch hollow stem, continuous flight augers. The borings will be performed utilizing an ATV-mounted drill rig and will generate an approximate 6-inch annulus. After geotechnical exploration is completed, the borings/auger probes will be backfilled with bentonite slurry, which has a consistency of two pounds bentonite powder to one gallon water. Borehole/auger probe abandonment will be performed by tremie-grouting via a positive-displacement pump from the bottom of the borehole/auger probe. | Building  | Construction | Miscellaneous         | Soil Boring | Permit Issued | 36.30      | 5784 0899  | 8    | 8A  |        | ECS MID-ATLANTIC, LLC  | 2200 Railroad, LLC c/o Simon Romano      |       |

The borings will be drilled utilizing 3.25-inch hollow stem, continuous flight augers. The borings will be performed utilizing an ATV-mounted drill rig and will generate an approximate 6-inch annulus. After geotechnical exploration is completed, the borings/auger probes will be backfilled with bentonite slurry, which has a consistency of two pounds bentonite powder to one gallon water. Borehole/auger probe abandonment will be performed by tremie-grouting via a positive-displacement pump from the bottom of the borehole/auger probe.   | Building  | Construction | Miscellaneous         | Soil Boring | Permit Issued | 36.30      | 5784 0900  | 8    | 8A  |        | ECS MID-ATLANTIC, LLC  | 2200 Railroad, LLC c/o Simon Romano      |       |
